African Scientific Reports

Introducing article numbering to African Scientific Reports

From the January 2023 issue, African Scientific Reports will use article numbers in place of the traditional method of continuous pagination through the volume. This step helps us to maintain a rapid, efficient production process by being able to define pagination as soon as a paper is accepted.

For papers that use article numbers the page number will start from 1 and the article number is used instead of the page range in the citation. e.g., C. A. Oyelami, W. Akande & T. O. Kolawole "A Preliminary Geotechnical Assessment of Residual Tropical Soils around Osogbo Metropolis as Materials for Road Subgrade", African Scientific Reports 2 (2022) 55. (article number: 55. https://doi.org/10.46481/asr.2022.1.3.55).

While journal volumes and issue numbers will remain in place, article numbering will now play the key role in identifying specific articles. With the introduction of article numbers, the article becomes citable as soon as the proof corrections have been incorporated, ensuring readers have access to the latest research faster.

In light of this, the table of contents in the print issue will reflect the order of the online issue; print readers will need to refer to the article number, clearly visible at the top of every page, to identify articles of interest. The printed issue spine will no longer include a page range.

We are delighted that readers of African Scientific Reports and authors will now enjoy these benefits
